

Chestnut tree

This is our presentation about
chestnut tree 😊

- Chestnut tree is 30 metres tall.
- Chestnut tree grows in Poland.
- It has grey bark.

Chestnut is a perennial tree. It blooms in May.
There are 25 species of chestnut.

Some forest animals eat chestnuts. In autumn children collect chestnuts and make decorations from them. They have dark brown shell with light brown dots.

Chestnut tree has got big, green leaves. Its flowers are white and pink. Flowers are in a form of pyramids.

Thank you for watching 😊
