

CYPRESSUS

CYPRESSUS BELONGS TO THE CYPRESS-LIKE FAMILY OF 18 SPECIES FOUND IN NORTH AMERICA, MEDITERRANEAN AND WESTERN ASIA.

- **I PLANTED IT WITH MY FATHER AND MY BEST FRIEND WHEN I WAS 3 YARS OLD. MY FRIEND LEFT GREECE 2 YEARS AGO. WHEN I LOOK AT THIS CYPRESS IT REMINDS ME OF HIM AND IT ALSO REMINDS ME OF THE BEAUTIFUL MOMENTS THAT WE HAD TOGETHER. THIS CYPRESS IS PLANTED IN FRONT OF OUR HOUSE AND EVERY CHRISTMAS WE LIGHT IT UP WITH LED LIGHTS AND IT IS AMAZING. EVERYONE WHO PASSES IN FRONT OF THE HOUSE FINDS IT VERY IMPRESSIVE.**

➤ **THIS CYPRESSUS HAS BEEN IN MY GARDEN FOR 10 YEARS AND IT IS ABOUT 15 METERS HIGH**

➤ THIS CUPRESSUS IS IN THE PYRAMID VARIATION. ITS BRANCHES ARE ERECT AND IT IS ALSO CALLED MALE CYPRESS. THE COMMON NAME COMES FROM OLD FRENCH CIPRESSUS AND THAT FROM LATIN CYPARISSUS, WHICH IS THE LATINISATION OF THE GREEK ΚΥΠΆΡΙΣΣΟΣ (ΚΥΡΆΡΙΣΣΟΣ)

➤ **IT GROWS UP REALLY FAST AND IT IS AMAZING.**
