

# THE LEMON TREE

Height: 6.2 up to 6.3 feet

Spread: 3 up to 10 feet

Growth Rate: medium

Fruit: lemon

Comments:

A beautiful tree with low requirements

It grows up only in Mediterranean countries

Value to Wildlife: it makes the soil more favored  
also it is a basic financial factor to Mediterranean  
agriculture

This tree means a lot to me. I planted it with a very good friend at the age of 3 with the help of our parents. Every time I pass in front of that tree, I remember the beautiful moments that we had together. This is not just an ordinary tree for us but one full of memories from our childhood.
