A few words about the almond tree

- This kind of tree produces a special kind of nuts called almonds
- The shape of the tree is like that of a usual tree
- The leaves of the almond tree have the shape of a flower and the nut grows in the centre of the nut
- Every spring it blossoms and becomes a beautiful tree
- The bark of the tree is usually short and thin. Also its color is dark brown.

The bark

The flowers

Our tree, our history...

Next to our house, there is an almond tree which has been there since our parents were kids. Now it is so big and so beautiful especially in spring when all its flowers blossom.
